

Application guide for wiring the **Lundahl LL1674** with a ratio of 8:1

Typical use: Parafeed linestage output.

Suitable tubes: 6n6p, 5687, ECC99, EC8010 to name a few.

This view is from the bottom up. Or as the datasheet says from the component side. In other words when actually looking at the pins you will solder.

NB: This is not an official Lundahl application note. Use it at your own risk.
